The Drexel LeBow MS in Economics

Offered by the School of Economics, the program is designed for students interested in becoming practitioners in industry, the financial sector, government, regulatory agencies or international organizations. This program is also ideal for students interested in pursuing a PhD in Economics, who seek to improve their study of math and economics to prepare them for doctoral studies.

Programmed for Success

Beginning in the fall quarter, the 45-credit degree is designed to be completed in about 18 months. Required classes provide a solid foundation in micro- and macroeconomic theory, statistics and econometrics.

Faculty

The Drexel LeBow economics faculty is ranked among the Top 100 of 1,400 economics faculties worldwide in the field of international trade. The faculty include leading scholars in trade, industrial organization, banking, fiscal and monetary policy and other areas.

The Skills to Innovate

The Drexel MS in Economics:

- Focuses on industry and policy economics for those looking for careers in both industry and the public sector
- Emphasizes empirical skills desired by employers and applicants
- Allows for graduate-level internship with credit available to domestic and international students the summer after their first year
- Offers optional PhD preparation tracks emphasizing the theoretical and mathematical skills necessary to enter such programs

Flexibility

In addition to training in core economics, rigorous quantitative methods and policy analysis, the MS in Economics provides flexibility with electives to shape students’ course of study to best match their career aspirations. Students can also enroll in graduate-level courses in finance, business analytics, marketing and business law, among others.

School of Economics

Drexel LeBow’s Economics Department was recently elevated to a School of Economics. This change reflects the expanding role of economics in many areas of research and the opportunity for deeper collaboration between students and faculty from economics and other academic disciplines.
