The Drexel LeBow MS Programs

The learning environment for the Masters of Science programs is supported by the latest technology and academic principles. By focusing on the specific area of study in Drexel LeBow’s rigorous curriculum, you will be prepared with the most relevant and applicable knowledge you need to succeed in your career.

Areas of Study

Accounting
Business Analytics
Economics
Finance
Marketing
Supply Chain Management and Logistics

Experiential Learning

Drexel’s reputation in applied learning shapes students’ academic experience. Real-world consulting, business simulations, case competitions and visits from industry leaders allow students to apply classroom learning to real scenarios. A rigorous curricula combined with experiential opportunities such as these ensure that you have the right expertise needed to excel in your selected field of study.

Critical Thinking

No matter the area of study, critical thinking is essential for a successful career. Our world renowned, industry-experienced faculty help develop these skills through innovative coursework that challenges students to think broadly, and analyze key data and information to reach new conclusions. These important skills are encouraged and nurtured.

Benefits

A Drexel LeBow degree is more than just an academic plan of study.
- Career advisors help create an individual career-advancement plan based on your personal experience, strengths and goals.
- Guest speakers and other learning experiences focus on topics ranging from budgeting, negotiating and communications to evaluating staff and working with executive boards.
- The dedicated Graduate Career Services Office and our vibrant network of alumni plus a calendar of events provide lifelong opportunities for making valuable professional connections.

MS in Accounting
This focused, cohort program offers the technical knowledge and the analytical and communication skills required to serve as ethical and effective accounting professionals. The program prepares students who hold bachelor’s degrees in accounting or non-accounting fields of study to sit for the CPA exam.

Program Start: Begins fall quarter;
Completion: 63 credit, full-time program with a schedule to completion in two years
Other: MS coupled with undergraduate degree may make you eligible for the CPA exam.

MS in Finance
This program is for those interested in establishing a career in finance or financial services, seeking career advancement or making a career change in the field. This program prepares students ultimately seeking to achieve the Chartered Financial Analyst (CFA) designation. This program may be combined for a dual degree with the MBA if certain requirements are met.

Program Start: Begins any quarter, international students must begin in fall;
Completion: 54 credit, full-time program, with a schedule to completion of less than two years. A part-time option is also available.
Other: Optional internship or consulting experiences available

MS in Business Analytics
This program is designed for students with an interest in quantitative methods, exploring and uncovering relationships through data analysis, using the data to solve business problems and a career in business analytics. The Master of Science in Business Analytics is also ideal for MBA students seeking a quantitative second degree.

Program Start: Begins fall quarter;
Completion: 45 credit, full-time program that can be completed in 15 months. A part-time option is also available.
Other: 4 concentrations available

MS in Economics
Offered by the School of Economics, the program is designed for students interested in becoming practitioners in industry, the financial sector, government, regulatory agencies or international organizations. This program is also ideal for students interested in pursuing a PhD in Economics, who seek to improve their study of math and economics to prepare them for doctoral studies.

Program Start: Begins fall quarter;
Completion: 45-credit full-time program with a schedule to completion of 18 months
Other: An undergraduate degree in economics is not required for admission.

MS in Marketing
This program combines a focus on current trends and innovations in new media marketing with insights from the psychology of consumer behavior. Students will also master cutting-edge research methodologies and techniques for deriving insight from analytical platforms.

Program Start: Begins fall quarter;
Completion: 45 credit, full-time program with completion in under two years
Other: Tracks of study include digital and mobile marketing; marketing analytics; and marketing neuroscience

MS in Supply Chain Management and Logistics
This dynamic program is designed for students who wish to develop themselves as managers or specialists in the operations of industrial and service systems. Supply chain management and logistics stresses a thorough knowledge of the rapidly changing techniques in systems analysis, in addition to an appreciation of all other phases of business.

Program Start: Begins fall quarter;
Completion: 45 credit, full-time program with a schedule to completion in less than two years
Other: After the common core, students select one of two tracks of study which are Industry Professional or Research.

HOW TO APPLY: Visit LeBow.Drexel.edu and schedule a visit, or start your application online. Prospective students are encouraged to apply early as these programs are extremely competitive.
