

# ECONOMICS

The School of Economics facilitates interdisciplinary connections to a wide range of fields through our flexible Bachelor of Arts or Bachelor of Science degrees. Our innovative, new combined majors in economics and business, economics and mathematics, and behavioral economics, business and organizations put us at the forefront of economic education.

Students graduate with a mastery of analytical and critical thinking skills as well as a crucial aptitude for sound decision-making and diverse, real-world experience through consulting courses and the Drexel Co-op program. Our research-active faculty are dedicated to mentoring and inspiring the next generation of leaders in industry, academia and government while staying at the frontier of economic research, publishing their work in top journals and collaborating with experts from around the world.
