

FINANCE

A strong global economy relies on professionals who have a mastery of how to allocate money to its highest value. The study of finance at Drexel LeBow provides students with an in-depth understanding of how businesses raise and invest capital, individuals allocate their savings among investment alternatives and markets function to equate the supply and demand of firms and investors. An undergraduate degree in finance gives students a thorough understanding of the basic concepts, principles, operating procedures and analytical techniques in financial decision-making.

DEGREE OPTIONS

- BS in Business Administration — Major in Finance
- BS in International Management (dual degree with Reutlingen University, Germany)
- BS in Business Administration/MBA
- Minor in Finance

COURSEWORK

- Corporate Finance
- Risk Management
- Investment Analysis
- Entrepreneurial Finance
- Applied Portfolio Management
- Global Financial Management
- Personal Wealth Management
- Derivative Securities

CAREER OUTLOOK

Career opportunities for students studying finance include serving as a financial and credit analyst, budgeting officer or securities broker. Finance majors also have opportunities in government regulatory agencies, and the major is an excellent preparation for professional certifications, including chartered financial analyst (CFA) and certified financial planner (CFP).
