

BACHELOR OF SCIENCE IN ECONOMICS

The STEM-designated Bachelor of Science in Economics provides a broad education with a focus on quantitative methods and professional skills. The degree also offers a large amount of free elective credits, giving students the flexibility to develop in-depth knowledge in a field outside of economics through a minor or double major. Upon graduation, students are well-prepared for successful careers in business, public service and institutions that address some of society's greatest challenges.

COURSEWORK

- Applied Econometrics
- Experiments and Causality in Economics
- Game Theory and Applications
- International Money and Finance
- International Trade
- Macroeconomics
- Microeconomics
- Using Big Data to Solve Economic and Social Problems

CAREER OUTLOOK

The BS in Economics will pave the way for students' careers, whether they're looking to inform key business decisions, impact government policy or pursue any opportunity that involves critical decision-making. Graduates of this program have landed at top organizations, such as BlackRock, the Federal Reserve Board, SpaceX and the Congressional Budget Office. They have also earned admission to competitive graduate programs at Columbia University, Princeton University, the University of Chicago and the London School of Economics.
