MANAGEMENT INFORMATION SYSTEMS

Management Information Systems (MIS) is the study of information systems and computerized information technology in business. These systems are fundamental for almost every contemporary firm, enabling the integration of information technology, people, processes and data. Other functional areas, such as accounting, supply chain, marketing and finance, depend on well-designed and reliable information systems. Supported by reputable faculty in the Decision Sciences department, the MIS program provides students with the skills and knowledge to be leaders in this essential business discipline.
