

BACHELOR OF SCIENCE IN ECONOMICS AND PUBLIC HEALTH

The STEM-designated Bachelor of Science in Economics and Public Health is a collaboration between the LeBow College of Business and the Dornsife School of Public Health. As one of the only programs of its type in the nation, this interdisciplinary program provides students with a highly sought understanding of our health and well-being through the study of traditional factors, such as the environment and access to health care, while also integrating broader concerns, such as human rights and social justice. In addition, the program offers one year of free electives to provide students with the flexibility to pursue other areas of interest.

COURSEWORK

- Applied Econometrics
- Environmental and Occupational Health
- Experiments and Causality in Economics
- Health Economics
- Health and Human Rights
- History of Public Health
- Issues in Global Health
- Macroeconomics
- Microeconomics

CAREER OUTLOOK

Graduates of the combined major in economics and public health will be especially well-prepared to enter the workforce in health services organizations, environmental science, health insurers, nonprofits and government entities. They will also be equipped for graduate study in public health, health sciences, public policy, economics or other social sciences.
