

BUSINESS ANALYTICS

Drexel LeBow’s business analytics program provides a curriculum that covers the entire lifecycle of data analysis, based around the program’s three pillars: statistics, data management and business modeling. Students adding business analytics as a co-major or minor will distinguish themselves from other job candidates and be better prepared for a data-driven world, where companies collect and analyze data to measure past performance and plan for the future.

DEGREE OPTIONS

- BS in Business Administration — Co-major in Business Analytics
- BS in Business Administration/MBA
- Minor in Business Analytics

COURSEWORK

- Introduction to Data Mining for Business
- Database Design and Implementation
- Programming for Data Analytics
- Business Analytics Senior Project
- Two elective courses in Business Analytics, e.g., Customer Analytics or Sports Analytics

CAREER OUTLOOK

Opportunities for graduates with a business analytics co-major have increased as most major organizations have adopted data-driven and technology-focused approaches, and candidates with business analytics experience are scarce. As the demand for business analysts grows, compensation is following. Graduates with a background in business analytics hold positions such as strategy consultants, research analysts, data scientists and supply chain managers. Many go on to complete graduate degrees in the field.
