

# MANAGEMENT INFORMATION SYSTEMS

Management Information Systems (MIS) is the study of information systems and information technology in business. These systems and technologies are fundamental for almost every contemporary firm, enabling the integration of people, processes and data. Other functional areas, such as accounting, supply chain, marketing and finance, depend on well-designed and reliable information systems. The MIS program at Drexel LeBow provides students with the skills and knowledge to be leaders in this essential business discipline.

## DEGREE OPTIONS

- BS in Business Administration — Major in Management Information Systems
- BS in Business Administration/MBA
- Minor in Management Information Systems

## COURSEWORK
