Drexel LeBow’s business and engineering program provides a cross-disciplinary skill set that helps graduates serve as a bridge between two areas of business and industry that often have a difficult time communicating. Students complete a set of broad business core courses along with a firm foundation in science, technology, engineering and mathematics (STEM). This program allows students the opportunity to study areas of operations management, technology innovation management, finance and marketing, as well as the functional areas of engineering.

DEGREE OPTIONS
• BS in Business and Engineering
• BS in Business and Engineering/MBA

COURSEWORK
• Core courses for business majors (Accounting, Finance, Marketing, etc.)
• Calculus, Chemistry and Physics
• Linear and Dynamic Engineering Systems
• Engineering Ethics
• Statistical Inference
• Technology Innovation Management
• Operations Management
• Project Management
• Engineering Design and Programming
• Engineering Concentration (e.g., Biomedical, Chemical, Civil, Electrical, Mechanical, Software)

CAREER OUTLOOK
A degree in business and engineering prepares students for careers in technology-driven organizations. Graduates of this program are well prepared to participate in innovative technological efforts in business with many desirable industries such as pharmaceuticals or aerospace engineering.
