LEARN MORE!

The STEM-designated Bachelor of Science in Economics and Mathematics is intended for students who have a strong interest in economics, applied mathematics and econometrics. The program emphasizes economics courses with more formal mathematical analysis and provides additional mathematics training, equipping students to understand and conduct more advanced research in economics and quantitative analysis. The combined major also offers one year of free electives, providing students with the flexibility to explore additional interests or transition from the combined major to a double major in economics and mathematics.

COURSEWORK

- Actuarial Mathematics
- Differential Equations
- Econometrics
- Linear Algebra
- Macroeconomics
- Mathematical Economics
- Mathematical Reasoning
- Microeconomics
- Time Series Econometrics

CAREER OUTLOOK

The combined major in economics and mathematics offers excellent career opportunities in government and private-sector roles, such as quantitative financial analyst, risk specialist or market analyst. The major also prepares students who are interested in pursuing a graduate degree in economics, finance and other fields with a focus on quantitative analysis.
