$23.25

Median co-op hourly pay for business and engineering majors

AVERAGE STARTING SALARY

$77,375

Average starting salary for business and engineering majors, class of 2025

Drexel's STEM-designated BS in Business and Engineering will provide you with a cross-disciplinary skill set to help you serve as a critical link between technical teams and business stakeholders. You'll complete business courses at the LeBow College of Business, including advanced coursework in quantitative analysis, modeling, technology and innovation, alongside engineering courses in the Nick Howley College of Engineering and Computing, with the option to concentrate on a particular engineering discipline. The program's integration of business education with engineering coursework provides a level of technical fluency that can differentiate you from traditional business majors, enabling you to contribute effectively in complex, technology-driven environments.

Degree Options

- BS in Business and Engineering

Coursework Examples

- Data-Driven Decision Models
- Competing in Technology Industries
- Technology Management
- Enterprise AI and Automation
- Transportation and Logistics
- Procurement and Strategic Sourcing
- Managing for Operational Excellence

Career Outlook

A business and engineering degree will prepare you to work in organizations where the two areas intersect, particularly in companies with research and development or technical operations. You'll be equipped to contribute to decisions that involve technical feasibility, performance and business impact in careers such as consulting, operations, product development and more.
