Drexel University's STEM-designated Bachelor of Science in Economics, housed in the School of Economics at the LeBow College of Business, focuses on providing the quantitative methods, analytical reasoning and professional skills required to understand economic systems and policy challenges. Learn from faculty who are recognized experts in areas such as international trade, macroeconomics and more.

Coursework Examples

- Applied Econometrics
- Experiments and Causality in Economics
- Game Theory and Applications
- Macroeconomics
- Microeconomics
- Time Series Econometrics

Career Outlook

A BS in Economics will position you to lead in analytically driven professions, such as consulting, policy analysis and finance. It can also prepare you with a strong foundation for graduate study in economics and related analytical fields.
