The STEM-designated Bachelor of Science in Economics and Data Science, housed in the School of Economics at the LeBow College of Business and offered jointly with the College of Engineering and Computing, combines economic theory with data science techniques to prepare you for analytical reasoning in a data-intensive world. You'll graduate ready to evaluate complex economic, business and policy challenges.

Coursework Examples

- Applied Econometrics
- Applied Machine Learning
- Deep Learning Architectures
- Experiments and Causality in Economics
- Game Theory and Applications
- Human-Centered Design
- Macroeconomics
- Microeconomics
- Social Media Data Analysis
- Using Big Data to Solve Social Problems

Career Outlook

The BS in Economics and Data Science will prepare you for a wide range of careers and graduate study pathways that rely on quantitative analysis, economic reasoning and data-driven decision-making. Career areas you may pursue include economic analysis, business or market research, or policy evaluation.
