Drexel LeBow's BSBA in Operations and Supply Chain Management (OSCM) prepares you to lead the operations and supply chains that create products, deliver services and maximize value for customers. You'll learn how operations and supply chains create services and products, including critical topics such as productivity, quality control, procurement and sourcing, while targeting sustainability and continuous improvement. Coursework also examines the growing role of AI and data-driven decision-making in modern supply chains.

Degree Options

- BS in Business Administration — Major in Operations and Supply Chain Management
- BS in Business Administration/MBA
- Minor in Operations Management

Coursework Examples

- Supply Chain Management
- Sustainable Supply Chain Management and Logistics
- Transportation and Logistics
- Procurement and Strategic Sourcing
- Managing for Operational Excellence
- Operations for Service Businesses
- Supply Chain Analytics

Career Outlook

A business degree with a major in operations and supply chain management will prepare you for opportunities across manufacturing, retail, healthcare, technology, transportant and many other industries. Common careers include supply chain analyst, procurement specialist and operations manager.
